

## **Program Outcomes**

The overall aims of the B.Sc Electronics are to:

1. Provide students with learning experiences that develop broad knowledge and understanding of key concepts of electronic science and equip students with advanced scientific/technological capabilities for analyzing and tackling the issues and problems in the field of electronics.
2. Develop the ability in students to apply knowledge and skills they have acquired to the solution of specific theoretical and applied problems in electronics.
3. Develop abilities in students to design and develop innovative solutions for benefit of society, through diligence, leadership, teamwork and lifelong learning.
4. Provide students with skills that enable them to get employment in industries or pursue higher studies or research assignments or turn into entrepreneurs.
